Initial Model Training Code, Model Validation and Evaluation Report

The initial model training code will be showcased in the future through a screenshot. The model validation and evaluation report will include a summary and training and validation performance metrics for multiple models, presented through respective screenshots.

Initial Model Training Code (5 marks):

```
# Set the number of steps per epoch and validation steps
steps_per_epoch = len(training_set) // 32 # 32 is batch_size
validation_steps = len(test_dataset) // 32 # 32 is batch_size

# Start model training
r = model.fit(
    training_set,
    validation_data=test_dataset,
    epochs=10,
    steps_per_epoch=steps_per_epoch,
    validation_steps=validation_steps
)
```

Model Validation and Evaluation Report (5 marks):
